Mothers has expanded its California Gold line with their new high-tech **Synthetic Wax**, the engineered alternative to natural wax. Easy to apply and simple to remove, Synthetic Wax makes car care a breeze. Safe for all paints and clearcoats, it can be safely applied in sun or shade, without having to rush removal.

It wipes off easily and cleanly, without smearing, streaking or blotching. Synthetic Wax also minimizes white marks on trim, as well as the powdery residue that other waxes can leave behind. Mothers California Gold Synthetic Wax, #05716 (16 oz.), is available at fine automotive retailers. More information about the entire line of quality California Gold paint care products is available at www.motherscaliforniagold.com.

New **Hose Candy Hose Skins** are now available to provide custom styling and enhanced performance under the hood. Designed to slide over stock or custom hoses to create the ultimate tailored appearance, Hose Skins are packaged in vehicle-specific kits to ensure the best possible fit and easy installation. Each kit includes pre-cut Hose Skins for the desired vehicle, Hose Candy Boa Clamps – new heat shrinkable clamps that tighten around hoses to create a leak proof seal correctly sized for each hose – and heat shrinkable hose end sleeves in a variety of colors. Vehicle-specific kits come in two different skin styles. For more information, call 435/673-0777 or visit www.hosecandy.com.

Eagle One has gone green with new **EnviroShine**, the first line of eco-friendly appearance care products to be available at auto parts retailers nationwide. Clean wheels and tires in one simple step with EnviroShine Wheel & Tire Cleaner.

Instant foaming action penetrates and releases brake dust and road grime on contact for a deeper clean. Spray on and in seconds you're ready to rinse and your wheels will shine and tires will be back to black. The line is available nationally at auto parts retailers. It is priced similar to other Eagle One products. For information visit www.eagleone.com or call 800/432-4531.

Chaotic Connections is a really great board that turns out to be crazy fun as players strategically create roadways across the USA! The object is to construct a road that connects their cities. Slow the progress of other players with "Detours." Block their travel plans with "Closed Roads." And, of course, watch out for sneaky players. This game is fun for children and adults who think and act like, well, kit car owners and builders. The game only takes a few minutes to learn and about 30-minutes to play from start to finish. Each new game brings new challenges, twists and turns. This game is so original that it has its own patent. www.chaoticconnections.com.

G2 Ford 8.8 Diff Cover. G2 aluminum differential covers are designed to protect your ring & pinion from impact, and cool your gear oil for prolonged bearing life. Made from high strength heat-treated

aluminum to withstand direct hits. Pro Comp/G@/Smittybilt/Rubicon Express; 877/852-7720; www.procompusa.com.

Every once in awhile we get a product news release that is so clever that we just have to tell you about it. Well, this product's packaging is not only clever, but the descrip-

tions of the **FaceLube** skin care program were entertaining. Think about how difficult touting a guy's every-day skin care regimen (no doubt a hit or miss effort for most of us) would be and you'll appreciate that the news release for FaceLube compared face care with the same amount of care you'd use to treat your beloved specialty car. The Anti-Aging cleaner is akin to the products used to keep your car's finish free of build-up that could damage the clearcoat finish. The FaceLube Treatment was compared to high-end synthetic fluids that refresh nutrients in vital components. And the Step 3 Protectant is like a high-performance additive package, or booster for your car's engine that works in conjunction with the fresh new motor oil. FaceLube Germany products can be purchased individually or as a three-step set for optimal results. FaceLube is having a "Model Year End Sale" by offering these products at a special rate. For a limited time, men can road test the all-new 2012 FaceLube Germany three-step kit for \$125 instead of the regular sticker price of \$245. It's like getting a BMW for the price of a Hyundai. FaceLube uses natural ingredients in its formulations, primarily focusing on anti-aging. They combine natural ingredients such as super botanicals (fruits and plants that have strong anti-aging properties) and the latest science-based anti-aging active ingredients to achieve sustainable results. Consider a test drive, www.facelube.com.
