

Liquid Armour Classic – What's In It & Why

Primary Active Ingredients In This Set:

Syn®-Ake (Dipeptide Diaminobutyroyl Benzylamide Diacetate) – Swiss developed synthetic tri-peptide derivative that mimics the activity of Waglerin 1, a polypeptide that is found in the venom of the Temple Viper. Clinical trial have shown that this active ingredient is capable of reducing mimic wrinkles by inhibiting muscle contractions for an Age Killing Effect.

Syn®-Coll (Palmitoyl Tripeptide-5) – Small peptide that stimulates collagen synthesis in human fibroblasts. This ingredient has a unique sequence to mimic the human body's own mechanism to produce collagen via TGF-B. Wrinkle appearance has been shown to improve 300% over 90 days.

Syn®-Hycan (Tetradecyl Aminobutyroylvalylaminobutyric Urea Trifluoroacetate) – ‘The Needle Free Hyaluronin Booster’ – Swiss developed tripeptide firms the skin from within and is the ideal ingredient for fighting sagging skin. Has the added benefit of strengthening collagen fibers.

Syn®-Tacks (Palmitoyl Dipeptide-5 Diaminobutyroyl Hydroxythreonine, Palmitoyl Dipeptide-5 Diaminohydroxybutyrate) – Developed by the Swiss, the combination of two peptides offer for the first time the ability to interact with the most relevant protein structures of the DEJ (dermal-epidermal junction). Significantly stimulated Laminin V, Collagen Type IV, VII, XVII and Integrin at the same time. This broad spectrum activity delivers visible benefits in skin structure.

Chromocare™ - HBA International Technology Award Finalist, this French developed active substance associates two plant extracts to form unprecedented anti-aging skin care based on chromophore mapping to give skin a fresher, younger look. Has the added benefit of reducing pigmentation and inflammation.

Renovage™ (Teprenone, Caprylic/Capric Triglyceride) - French developed pluripotent active ingredient able to act as a cell facilitator and corrector. Delays the skin's functional and structural aging.

Matrixyl®Synthe 6™ (Palmitoyl Tripeptide-38) - a new member of the Matrixyl® range, this French developed active ingredient fills in wrinkles from the inside both on the forehead and the crow's feet for a visibly smoother and plumper skin. It's matrikine-like effect stimulates 6 major constituents of the skin matrix and dermal-epidermal junction (DEJ) and ensures optimal architecture of the tissue.

Thiotaine® (L-Ergothioneine) - Natural antioxidant and amino acid, reduces TNF-Alpha, a stress signal cytokine and reduces inflammation. Increases fatty acids in mitochondria allowing higher efficiency in oxygen metabolism, therefore increasing energy level in cells.

Resistem™ (Globularia Cordifolia Extract) - A New Technology Award nominee, this French developed active ingredient is an anti-ageing “bodyguard” of the skin. It helps skin to naturally decrease the level of pro-aging agents while reducing the toxin-induced micro inflammations. In vivo studies demonstrated its ability to soothe the skin, reduce redness, improve the evenness of the complexion and restore its natural glow.

Haloxyl™ (Steareth 20, Chrysin, N-Hydroxysuccinimide, Palmitoyl Oligopeptide, Palmitoyl Tetrapeptide-7) – French developed active ingredient reinforces firmness and tone of the eye area. Activates elimination of blood originated pigments responsible for dark under eye discoloration and local inflammation.

Spirulina Platensis (Phycocyanin) Extract – a blue-green algae with antioxidant and anti-inflammatory properties found in the oceans and alkaline lakes of Africa and South America.

Blue Lotus - Antioxidant, anti-inflammatory, Vitamin P, rich in flavonoids, phytopsterols, rutin, quercetin.

Daisy - Reduces melanin formation, inhibits tyrosinase activity, ROS (free radical) scavenging, endothelin antagonist.

EGCG - Heart of green tea, antioxidant, anti-inflammatory, protects from and repairs UV damage, increases skin thickness.

Glycolic - Facilitates cell turnover.

L-ascorbic Acid - Antioxidant, free radical scavenging, collagen building.

Olive - Antibacterial, anti-inflammatory.

Retinyl Palmitate - Antioxidant, accelerates cell renewal, stimulates fibroblast/collagen.

Sencha - Antioxidant, anti-inflammatory, calms rosacea.

Ubiquinone - Antioxidant, protects from free radicals, prolongs cell life.

Presentation: **Cleanser - 2oz/60 ml** **Treatment - 1oz/30 ml** **Protectant - 1oz/30 ml**
